

Subject Code: 02PY0132
Subject Name: Physics-I
B.Sc. Year – I (Sem-I)

Objective: To be able to apply the fundamental laws of motion, Rotational motion, Simple Harmonic Motion (SHM), Gravitation and their applications in various scientific fields.

Credits Earned: 5 Credits

Course Outcomes: After completion of this course, student will be able to

- Apply knowledge of fundamental laws of physics to solve scientific problems.
- Apply knowledge of rotational motion and SHM to solve problems of dynamics.
- Apply knowledge of Gravitation in field of space science.

Teaching and Examination Scheme

Teaching Scheme (Hours)			Credits	Theory Marks			Tutorial/ Practical Marks		Total Marks
Theory	Tutorial	Practical		ESE (E)	Mid Sem (M)	Internal (I)	Viva (V)	Term Work (TW)	
4	0	2	5	50	30	20	25	25	150

Contents:

Unit	Topics	Contact Hours
1.	Vector analysis and Laws of motion : Concept of scalar and vector, Adding Vectors Geometrically, Components of vectors, Unit vectors, Adding Vectors by Components, Vectors and the laws of physics, Multiplying Vectors. Newtonian Mechanics, Newton's First Law of Motion, Force, Mass, Newton's Second of Motion, Some Particular Forces, Newton's Third Law of Motion, Applying Newton's third law.	15
2.	Rotational Motion : The Rotational variables, Relating the linear and Angular variables, Kinetic energy of Rotation, Angular momentum, Calculating rotational Inertia, Torque, Newton's Second law for Rotation, Conservation of Angular Momentum, Precession of a Gyroscope, Rolling as Translational and Rotation Combined.	15
3	Gravitation : Newton's laws of Gravitation, Gravitation and the principle of Superposition, Gravitation near Earth's surface, Gravitation inside Earth, Gravitational Potential Energy, Planets and Satellite, Kepler's laws, Satellite Orbits and Energy, Einstein and Gravitation.	15
4.	Simple Harmonic Motion : Simple Harmonic Motion, The force law for Simple Harmonic Motion, Energy in Simpler Harmonic Motion, An Angular simple Harmonics Oscillator, Pendulums, Simple Harmonic Motion and /Circular Motion, Damped Simple Harmonic Motion, Forced Oscillations and Resonance.	15

Reference Books :

1. Principles of Physics – Halliday, Resnick and Walker, 10th edition Wiley Publication (2015)
2. SEARS AND ZEMANSKY'S University Physics with Modern Physics 13th edition by H. D. Young and R. A. Freedman. Pearson Publication (2012)
3. Lectures on Physics Vol. 1, 2, 3 by Feynman, Pearson Publication (2009)

Suggested Theory distribution:

The suggested theory distribution as per Bloom's taxonomy is as per follows. This distribution serves as guidelines for teachers and students to achieve effective teaching-learning process

Distribution of Theory for course delivery and evaluation					
Remember	Understand	Apply	Analyze	Evaluate	Create
20%	20%	30%	15%	10%	5%

Suggested List of Experiments:

1. To perform the measurement of acceleration due to gravity using Kater's pendulum.
2. To find the Young's modulus by Koenig method.
3. To study Newton's law of cooling.
4. To measure moment of inertia of given disc with help of torisional pendulum.
5. To find out Average error, R.M.S error and probable error in observation.
(Using Vernier Callipers and Micrometer Screw)
6. To perfrom the calibration of travelling microscope and measurement of surface tension.
7. To study V-I characteristics of Solar cell.
8. To find coefficient of friction for different surfaces and for different loads.

Instructional Method:

- a. The course delivery method will depend upon the requirement of content and need of students. The teacher in addition to conventional teaching method by black board, may also use any of tools such as demonstration, role play, Quiz, brainstorming, MOOCs etc.
- b. The internal evaluation will be done on the basis of continuous evaluation of students in the laboratory and class-room.
- c. Practical examination will be conducted at the end of semester for evaluation of performance of students in laboratory.
- d. Students will use supplementary resources such as online videos, NPTEL videos, e-courses, Virtual Laboratory
