

Subject Code: 01ME0822
Suubject Name:IoT for Manufacturing
B.Tech h.. IV Year(Sem-VIII) Mechanical Engineering
Type of course: Programme Elective

Prerequisite: NA

Rationale: The course is prepared to provide the detailed understating of IOT for manufacctu uring

Teaching and Examination Schemmee:

Teaching Scheme(Hours)			Credits	Evaluation Scheme					Total Marks
Theory	Tutorial	Practical		Theory Marks			Practical Marks		
				ESE (E)	IA	CSE	Viva (V)	Term Work (TW)	
4	0	2	5	50	30	20	25	25	150

Course Outcome

Students will be able to

1. Design an IoT system with cloud infrastructure
2. Implement the M2M Communication protocols in a prototype
3. Understand the basic concepts of the main sensors used in electromechanical systems
4. Understand/implement computer models of common engineering information types.
5. Understand storage mechanisms / analysis algorithms for data management in distributed & data intensive applications.

Course Content

Sr no	Contents	Total hour	Weightage
1	IoT and Cloud Computinng Introduction, Physical design of IoT, Logical design of IoT, IoT enabling technologies, Domain specific IoTs ,IoT design methodology, logical design ,IoT physical devices (such as Raspberry Pi, pcDuino, Beaglebone black, Cubieboard) , Introduction to cloud computing: cloud models, cloud service examples, cloud based services & applications, Cloud service and platforms	8	18

2	Applied Machine to Machine Communication Introduction to M2M, Description of M2M Market, Segments/Applications – Automotive, Smart Telemetry, Surveillance and Security, M2M Industrial Automation, M2M Terminals and Modules	6	14
3	Mechatronic Systems Design Introduction: Mechatronics, history, applications, and trends, Sensors and transducers, Signal conditioning, Mechanical components, Software development, Pneumatic and hydraulic actuators, Microcontrollers, Basic closed-loop control	6	14
4	Information Systems in Manufacturing Manufacturing organizations, management, and the networked enterprises, Globalization challenges and opportunities, Dimensions of Information systems, Approaches to study information system, Technical and Behavioral approach, Information Technology Infrastructure	12	27
5	Analytics & Systems of Big Data Mapreduce abstraction, Google paper, Google systems, GFS, BigTable, Cluster and Data center network, Distributed Storage, Facebook photo storage, Azure storage systems. Data deduplication storage systems, Venti and DDFS, Data preprocessing, predictive techniques, association rules, classification, clustering, supervised v/s unsupervised learning, algorithms, domain specific feature extraction, similarity measures, Shingles and minhashing, locality sensitive hashing, Dimensionality reduction techniques, Clustering in high dimensional space, Web link analysis.	12	27

Distribution of Theory Marks

Remembrance	Understanding	: Application	Anlyze	Evaluate
15	20	25	25	15

List of experiments

1. Case study on application off IoT in casting industry
2. Case study on application off IoT in fabrication industry
3. Case study on application off IoT in machining industry
4. Case study on application off IoT in forming industry
5. Case study on application off IoT in quality control
6. Case study on application off IoT in production planning
7. Case study on application off IoT in maintenance
