

Subject Code: 00000000
Subject Name: Research and Communication Skill
M.Tech. I Year – (Sem-1) CAD/CAM
Type of course: GN-UC
To the Student:

The purpose of this subject is to orient the students to the scientific methodology of research and presenting their thesis. Research constitutes primarily of literature review, giving critical comments on the literature reviewed and identifying the gap, problem formulation, modeling in either an analytical or experimental set up, validating the model and solving the problem you set for yourself.

At the end, student should be able to present and defend the solution he/she has found, in a simple and easy manner. Communicating the research outcomes, is an art wherein, you do not want to either undermine or over emphasis the content, within the short time limit given for such presentations. The balance of critical technicality and overall outcomes is the key to an effective presentation. The language, content and articulation should be such as to convey in a unified manner, the gist of your work.

To the Teacher:

It is envisaged that the teacher will discuss actual case studies to make the student understand the concepts of demonstration of examples during theory. Theory classes will be used to explain each of the concepts in Module 1 and 2. This syllabus is based on the model AICTE course prescribed in May2018.

Teaching and Examination Scheme:

Teaching Scheme (Hours)			Credits	Evaluation Scheme					Total Marks
				Theory Marks			Practical Marks		
Theory	Tutorial	Practical		ESE (E)	IA	CSE	Viva (V)	Term Work (TW)	
2	2	--	3	---	30	20	25	25	100

COURSE OUTCOME

Students will be able to

1. Conduct a quality literature review and find research gap.
2. Identify an original and relevant problem and identify methods to find its solution
3. Validate the model.
4. Present and defend the solution obtained in an effective manner in written or spoken form.
5. Follow research ethics

6. Understand IPR protection for further research and better products.

SR No	CONTENTS	TOTAL HOURS	WEIGHTAGE
1	<p>Starting Research:</p> <p>Find what is expected of you Identify specific requirements for evaluation/review and what constitutes completion of your work, Find where the source is available, Establish proper methods for finding the relevant material from the source.</p> <p>Analyze the question Identify key areas in your field, Determine the nature and extension of papers that you should read</p> <p>Identify the gaps Learn to Critique existing knowledge and how to find the gap</p> <p>Formulate the problem statement Understand what should be the key aspects of your problem statement, Examples of effective and ineffective Titles</p> <p>Validation Identify problem and experimental/theoretical data for comparison with your model, Learn how to extrapolate/scale data for validation, Find what acceptable level of error and justification thereof is.</p>	6	
2	<p>Finding Good Literature:</p> <p>Decide which sources you will need Differentiate between journals, conferences, books, magazines and their quality, Understand how to establish their quality and authenticity.</p> <p>Finding information How to conduct effective searches, How to find relevant papers related to your area of research, How to capture critical information.</p> <p>Identify main ideas in scholarly literature Understand and identify the bias, theoretical position and evidence produced</p> <p>Write notes to organize your ideas Compare ideas and concepts from different papers</p>	4	

3	<p>Writing and Presenting Your Work:</p> <p>Effective technical writing How to write Report, Paper, Developing a Research Proposal, Format of research proposal</p> <p>Build your argument Recognize the importance of emphasizing your point, Distinguish between your point and the evidence available , Acknowledge the evidence</p> <p>Review and finalize your work Know and follow the Process of reviewing and proof reading your work, Use feedback to improve your work</p> <p>Check the logistics of your presentation Identify the key message of your presentation, Understand the expectations and what will be the key review points</p> <p>Develop a structure of your presentation Understand the key components of an oral presentation, Know the usual structure of a good presentation</p> <p>Prepare a delivery of your oral presentation Rehearse and time your presentation, Prepare to answer questions from the audience: Fundamental concepts should be spoken from memory as reviewer will be looking for evidence of your thorough understanding, Read more than the content you are presenting; keep sources ready on hand for reference.</p>	8	
4	<p>Intellectual Property:</p> <p>Patents, Designs, Trade and Copyright Process of Patenting and Development: Technological research innovation, patenting, development.</p> <p>International Scenario International cooperation on Intellectual Property. Procedure for grants of patents, Patenting under PCT.</p> <p>Patent Rights Scope of Patent Rights. Licensing and transfer of technology. Patent information and databases. Geographical Indications</p> <p>New developments in IPR Administration of Patent System. New developments in IPR;</p>	8	

	IPR of Biological Systems, Computer Software etc. Traditional knowledge Case Studies
