

## MY SUCCESS STORY

### I am

Jash Mehta  
Munich, Germany  
My batch  
B.E. Mechanical Engineering, 2020

### Current Designation and occupation

I am working as an assistant vice president in Corporate Strategy Management – Reinsurance Industry.

### My Achievements

I was good in academics and secured 2<sup>nd</sup> rank in academic year 2020 in my class.

### My inspiration

I was always keen on understanding the basic mechanism running behind any working system. This curiosity made me chose mechanical engineering & later on the same curiosity made me chose masters in management course in Germany. I have always preferred holistic knowledge over niche expertise. Strategy management is a field which doesn't expose one to only single area of work but it exposes to the entire value chain system of a company or even industry.

One simply can't connect all the dots without seeing the bigger picture. So, in my case it was the urge to know & understand the bigger picture made me select 'Strategy Management' as a career field.

### My Challenges

I suffered from low self-confidence during my early college days. Also, I had a feeling of Inferiority complex during those days

### My Invaluable Motivators

My mother has always stood by my side during challenging circumstances and consequently, is my main source of motivation.

### Contribution from the Marwadi Family

Being one of the best engineering colleges in Gujarat, MEFGI provided me the right platform to interact with the like-minded people. My professors were very supportive & they also acted as mentors for the most of us.

### My future plans

I'll gain some more experience in the same field & after (10+ years) that, I'll probably either join the executive team or start my entrepreneurial journey.

### My way of being connected to Marwadi Family

I would be more than happy to stay connected with the MEFGI & to help other students achieve their dreams.
