

MY SUCCESS STORY

I am

Mahrshi Jani
Dallas
My batch
B.E. Electrical Engineering, 2016

Current Designation and Occupation

Working as a PhD Research Scholar in
Biomedical Engineering at Dallas.

My Achievements

1) Dr. Robert C. and Mrs. Carol D. Eberhart
Outstanding Bioengineering Student
Scholarship Award (2018 -2019).

My inspiration

I got my inspiration for my current career option from Dr. Dinesh Kumar. He was my mentor in my bachelor project in engineering. He has very good experience of research in Biomedical Engineering. I did lot of interactions with him through the last year of my engineering through him I got inspiration to choose this path of Biomedical Engineering.

My Challenges

Resilience is the key to overcome any problem in life. No matter how big the problem is if you keep your mind calm, have some patience and take right decision you will come out from the problem soon.

My Invaluable Motivators

My parents are the biggest motivation for me. They always provide me all the resources and mental support I need in my life. Also electrical engineering department of MEFGI help me a

lot during my study and further to decide my career path.

Contribution from the Marwadi Family

It's a great platform for the students in terms of faculties and facilities. I learnt a lot of extra stuffs that is useful for me in the future i.e. MATLAB simulation and programming, microcontroller programming. Through the interaction with the faculties I got inspiration for my future career.

My future plans

My immediate plan is to finish my Doctoral study in 3 years and earn my degree. My long term plan is to contribute in the field of Science (spatially in cancer imaging) as a scientist.

My way of being connected to Marwadi Family
