

MY SUCCESS STORY

I am

Nipun Parekh
Rajkot
My batch
B.E. Information and Communication
Technology, 2021

Current Designation and occupation

I am currently working as DevOps engineer at
Yudiz Solutions Pvt Ltd, Ahmedabad

My Achievements

I got selected as AWS Community Builder, in
which only 800 people got selected from all
around the world. In addition to this, I was
Microsoft Student Ambassador of Beta level

My inspiration

I have got Inspiration from Internship at sem-4
vacation time. I have done internship in Linux
and cloud domain with the NIT students, from
that I have get came to know about what cloud
computing is, DevOps domain and how that are
helpful for developer as well as IT company.
After that internship I have started exploring
more about the cloud/ DevOps. So, from my
semester 4 internship I have got inspiration. At
last, I would like to thank Marwadi University
for this kind of amazing learning pattern, and
special Thanks to Prof. Chandrasinh Parmar
for always supporting students.

My Challenges

The biggest Challenge that I have faced is when
Microsoft has invited you as judge/ mentor for
MLH DubHack2020 Australia.

As being a mentor, our prime goal is to solve
the problem of participants I still remember

the participant name JOE he has completed his
whole project, but he was not able to upload
image in Microsoft Cloud using JavaScript. So,
without that image his project will not work.
At the main thing was that only 30 mins was
remaining to submit the solution. I was trying
a lot to solve his problem but not able to find
the solution.

Then at last 15 min he was continuously telling
me sir pl. help me and I was not able to solve
his problem. I was looking at his JavaScript
code, but his code was working fine, Then I
think with different scenario and I have check
cloud storage policy and I have got the error
that the policy was private so we can't add
image then solved his error and he has got the
unique solution winner. So that was biggest
challenge I have faced.

My Invaluable Motivators

Parents are my support system when I was
there in any kind of confusion or in tension,
they always seat with me and guide me.
Teachers always ready to help me in at any
time. They guided me the right path like I am
very enthusiast about cloud domain then
teachers have guide me like go for the
certification. Because this domain is whole
depended on Certifications.

Contribution from the Marwadi Family

Marwadi University has helped us in many
ways. The one which I liked the most is that
MU allow adjunct faculty to come and teach
students with their industrial knowledge from
this we will get awareness like what industry
need and how we can be industry ready.

My future plans

Immediate plan is to go for Azure certification/
AWS certification. While, long-term Plan is to
get a job in AWS as a DevOps Engineer.

My way of being connected to Marwadi Family

Through LinkedIn and mail.
