

## MY SUCCESS STORY

### I am

Nisarg Satani  
Rajkot  
My batch  
B.TECH. Information and Communication  
Technology, 2021

### Current Designation and Occupation

Working as DevOps Intern / DevOps Engineer  
at Rajkot.

### My Achievements

1) AWS Certified Cloud Practitioner, Reached  
Finals of SSIP Hacktathon Gujarat and lead a  
team of 6.

### My inspiration

Why- I didn't wanted to do the same work  
what all CS/IT engineer is doing, making  
software and all. I wanted to work in  
something which excites me every morning to  
go work. How- I got inspired by this career  
option after we started to learn a subject cloud  
computing from Janak Sir, while learning the  
subject Janak Sir enlightened us about DevOps.  
This was possible due to Parmar Sir if he  
haven't introduce us to Cloud Computing  
subject in Semester 5th I wouldn't have this  
option for career. When- I got inspired while  
learning Cloud Computing subject and  
explored the future of cloud computing. Read  
some articles about Cloud in newspaper and I  
felt that yes this is what I want to do, this is  
what I would enjoy to work in.

### My Challenges

The biggest challenge faced was that first I  
wanted to go for VLSI(Semiconductor Design),  
but back of the mind I wanted to go for  
DevOps. Starting of 7th Semester we got to

know that VLSI companies don't hire people  
who have less than 60% in 12th board. So that  
was a blow which came and after that I have  
started working for software development. But  
than I got an internship for DevOps and  
worked for 6 months. That company was UK  
based which took a seminar in our class and  
they contacted our HOD for internship that's  
when the journey started.

### My Invaluable Motivators

Parents supported and trusted me for every  
decision which I made for the future. Teachers  
supported by teaching, guiding and mentoring  
for our career. Parmar Sir gave many  
opportunities like interacting with their  
alumina students, learning by doing pushing us  
to participate in National level competitions  
like Hackathons. Setting up lectures from  
Industry person.

### Contribution from the Marwadi Family

MU provided much needed resources and  
environment for Engineering and getting  
placed in an MNC.

### My future plans

Immediate- Clearing most required AWS  
Certifications which will boost my career.

Long Term- Go abroad for settling or working  
for some years and come back to India, earn  
respect, Might go for Master's Degree(Distance  
Learning), Become a best DevOps Engineer, If  
possible give back to the community.

### My way of being connected to Marwadi Family

Through Social Media, Through my number, In  
person
