

## MY SUCCESS STORY

### I am

Saloni Sureja Kamleshbhai  
Rajkot  
My batch  
B.E. Computer Engineering, 2020

### Current Designation and occupation

I have completed my Masters of Engineering and looking forward for opportunity to progress in academics.

### My Achievements

I was felicitated with gold medal for standing 1<sup>st</sup> in master of engineering (CE). I also received a certificate of paper presentation at International Conference on Applied Soft Computing and Communication Networks at (IIITM - K). Received appreciation for volunteering at TEDx Marwadi University.

### My inspiration

As I have always been fascinated with IT world, it inspired me to take the computer field as my career goal. When I completed my bachelors, I got more interest in the upcoming technologies and exploring it through a new way like research. That took me towards my current career i.e., Masters of Computer Engineering.

### My Challenges

It is a continuously growing field so the biggest challenge I faced was to decide the area of interest and the area of research. As the area of research should be latest and a part of upcoming technologies. So to overcome this

challenge I took the advice from various platforms and from guide.

### My Invaluable Motivators

First and foremost, my parents have played a crucial role in framing my career with guidance and their constant support and motivation. Secondly, I would like to mention my guide Prof Tarannum Bloch who not only guided me with my research but also implanted a good source of confidence in me to face the challenges and also our Head of the Department Dr. Nitul Dutta played a crucial role in boosting my confidence throughout the journey. Last but not the least I would like to mention my friends who gave me a constant nudge when I felt low.

### Contribution from the Marwadi Family

MEFGI as a valuable contributor has helped me develop a strong personality and has given lots of opportunity for self-growth.

### My future plans

First and the foremost thing I would like to mention that there is nothing sort of immediate or long-term plan. I had always focused on step-by-step growth towards my career. My focus right now is moving forward towards the academics where I would like to contribute as a faculty.

### My way of being connected to Marwadi Family

As I mentioned above, I am focused towards step-by-step growth so in near future whichever institute I will be serving as a faculty my inspiration would always be to become same as my faculties with or without being in touch with them. I'll always be in touch with institutes values. A student is always a student so wherever I will be I will always have its virtues within me. Lastly I am grateful to be an alumni of such a valuable institute.
