

Courses that teach specifically on climate science and/or environmental sustainability

Marwadi University offers a range of programs and courses focused on climate science and environmental sustainability across various faculties.

Master of Science (M.Sc.) in Environmental Science: This postgraduate program provides comprehensive knowledge on environmental topics, including:

- Remote Sensing & GIS Technology
- Natural Disasters & Climate Change
- Environmental Policies & Legislations

The curriculum is designed to equip students with both theoretical understanding and practical skills in environmental science.

Master of Technology (M.Tech.) in Environmental Engineering: This program focuses on advanced environmental engineering principles, covering subjects such as

Environmental Policy & Management

- Environmental Toxicology & Risk Assessment
- It aims to prepare students for addressing complex environmental challenges through engineering solutions.

B.Sc (Hons) in Agriculture

This undergraduate program integrates modern agricultural practices with environmental sustainability. It educates students on climate-resilient and hi-tech agriculture, aiming to transform traditional farming methods and promote sustainable agricultural development.

Bachelor of Technology (B.Tech.): The B.Tech. curriculum includes the course "Basics of Environmental Studies," which introduces students to fundamental environmental engineering concepts, emphasizing the importance of population forecasting, ecology, and their effects on the environment.

These programs and courses reflect Marwadi University's commitment to integrating climate science and environmental sustainability into its academic offerings, preparing students to contribute effectively to environmental conservation and sustainable development.
