

## UNIVERSITY ASSESSMENT TOOL FOR ASSESSING SUSTAINABILITY LITERACY AND KNOWLEDGE OF ALL STAFF

Marwadi University recognizes the importance of sustainability literacy and knowledge among its students, faculty, and staff. To assess and enhance sustainability literacy across the university community, an assessment tool has been developed to measure individuals' understanding of sustainability concepts, principles, and practices. This tool is available in Erp login of students, faculty, and staff members.

### **Objectives:**

To evaluate individuals' awareness and comprehension of sustainability issues, including environmental, social, and economic dimensions.

- To identify areas of strength and areas needing improvement in sustainability literacy.
- To inform the development of targeted educational initiatives and sustainability programs.
- To track progress and evaluate the effectiveness of sustainability education efforts over time.

The assessment tool consists of the following components

- Multiple-Choice Questions
- Scenario-Based Questions
- Self-Assessment

## **Development Process**

The assessment tool was developed by a Marwadi Technologies and multidisciplinary team of sustainability experts, educators, and assessment specialists at Marwadi University . The content was informed by relevant literature, best practices in sustainability education, and consultation with stakeholders within the university community.

## **Implementation:**

The Sustainability Literacy and Knowledge Assessment Tool are administered online through the university's ERP system which have the assessment platform. It is integrated into existing courses, workshops, or sustainability initiatives as a pre- and post-test measure to assess learning outcomes and knowledge retention.

## **Data Analysis and Reporting:**

Upon completion of the assessment, data will be collected and analyzed to identify trends, strengths, and areas for improvement in sustainability literacy across different demographic groups within the university. Reports will be generated to inform decision-making and curriculum development efforts.

## **Continuous Improvement:**

The assessment tool will be reviewed and updated periodically to ensure its alignment with evolving sustainability priorities, emerging issues, and best practices in sustainability education. Feedback from participants and stakeholders will be solicited to improve the relevance and effectiveness of the assessment process.
