

COURSE TITLE	MATERIAL SCIENCE AND METALLURGY
COURSE CODE	01ME2403
COURSE CREDITS	4

Objective:

- 1 The course intends to provide understanding of Engineering Materials to graduate students. The course should enhance their ability to understand structure-property and performance relationship of materials.

Course Outcomes: After completion of this course, student will be able to:

- 1 Apply material knowledge to identify, compare, and recommend suitable applications.
- 2 Analyze the effect of microstructure and processing routes on material properties and performance.
- 3 Interpret & analyze phase diagrams and solidification to predict microstructures.
- 4 Evaluate effects of heat treatment on microstructure & properties.
- 5 Assess non-destructive testing (NDT) methods for detecting defects and ensuring material quality.

Pre-requisite of course:Basic knowledge of Physics, Chemistry

Teaching and Examination Scheme

Theory Hours	Tutorial Hours	Practical Hours	ESE	IA	CSE	Viva	Term Work
3	0	2	50	30	20	25	25

Contents : Unit	Topics	Contact Hours
1	Introduction Properties of materials,, Engineering Requirements of materials,, Classification of Engineering Materials,, Criterion for selection of materials,, Advance Engineering Material Composites: Introduction, Properties and types of matrix materials,, Properties and types of reinforcements,, Manufacturing methods and applications.	7
2	Metallography Macro-examination and Micro examinations,, Procedure for preparing the specimen for macro and micro examination., Microscopic Techniques: Optical Microscope,, SEM, .TEM	4
3	Non- ferrous alloys Introduction, Aluminium Alloys, Magnesium and Beryllium Alloys,, Copper Alloys, Nickel and Cobalt Alloys,, Titanium Alloys, Refractory and Precious Metals.	3

Contents : Unit	Topics	Contact Hours
4	Ferrous Materials and Non ferrous Materials Pig Iron, Wrought Iron Cast Iron: Classification of Cast irons Gray cast irons, nodular cast irons,, white cast irons, malleable cast irons, chilled. Effect of various parameters on structure, properties of cast irons., Applications of cast irons for different components of machine tools, automobiles, pump, etc., Steel: Classification and application of steels,, Effect of alloying elements, Specification of some commonly used steels for Engineering applications (e.g. En. AISI, ASTM, IS etc.) with examples., Classification and application of plain carbon steels., Examples of alloy steels such as high manganese steel, Ball Bearing steels,, Maraging steels, Spring steels, Tool steels Stainless steels.	8
5	Solidification of Metals and Phase Diagrams: Solid Solutions: Types Solid Solutions, Hume-Rothery's Rules. Concept of solidification of metals,, Solidification of pure metals, Nucleation, Growth, Growth of the new phase,, Solidification of alloys, Progressive, Directional solidification & control of solidification to obtain sound casting., Phase Diagrams: Objectives & classification of System, phases & structural constituent of phase diagram,, Gibb's solid phase rule, Cooling Curves (Time-Temperature Curves),, Eutectic, Peritectic & Eutectoid system,, Equilibrium diagrams for non ferrous alloys, Lever rules.	7
6	Iron-Carbon Diagram and Heat Treatment Processes: Allotropic forms of Iron, Iron- Iron carbide equilibrium Diagram,, Development of microstructure in iron-carbon alloys., Heat Treatment: Definition, Purpose & classification of heat treatment processes for various types of special steels,, Introduction applications of various case hardening & surface hardening treatments., TTT & CCT curves.	10
7	Non-Destructive Testing's (NDT) Radiography Testing, Dye, Penetration Testing, Magnetic Particle Testing,, Ultrasonic Testing. Eddy current testing with their Principle of non-destructive testing,, the test methods, relative merits, , demerits and applications.	4
8	Powder Metallurgy Introduction, Methods of manufacturing powders,, mixing of powders, compaction, sintering,, secondary operation, advantages and limitation of powder metallurgy.	3
Total Hours		46

Suggested List of Experiments:

Contents : Unit	Topics	Contact Hours
1	To understand the construction and working of a Metallurgical Microscope. To understand the construction and working of a Metallurgical Microscope.	2
2	To study of microstructures for various ferrous and non ferrous materials. To study of microstructures for various ferrous and non ferrous materials.	2
3	To prepare the specimen for microscopic observation. To prepare the specimen for microscopic observation.	2
4	To determine the strength and hardness of ferrous and non-ferrous specimen. To determine the strength and hardness of ferrous and non-ferrous specimen.	2
5	To study the effect of Heat treatment process on the Hardness and Tensile Strength of Mild Steel. To study the effect of Heat treatment process on the Hardness and Tensile Strength of Mild Steel.	2
6	To show the effect of different quenching media (Oil, Water and Brine) on the hardness of Mild steel. To show the effect of different quenching media (Oil, Water and Brine) on the hardness of Mild steel.	2
7	To determine the harden ability of a specimen by Jominy end quench test. To determine the harden ability of a specimen by Jominy end quench test.	2
8	To study of powder metallurgy. To study of powder metallurgy.	2
9	To determine the surface defect by liquid penetrant test and magnetic particle test. To determine the surface defect by liquid penetrant test and magnetic particle test.	2
10	To determine the internal defect by Ultrasonic Test. To determine the internal defect by Ultrasonic Test.	2
Total Hours		20

Textbook :

- 1 Introduction to physical metallurgy, Sidney H. Advner, Tata Mcgraw -Hill, 2008
- 2 Essentials of materials science and engineering, Donald R. Askeland , Wendelin J. Wright, Cengage, Boston, 2019

References:

- 1 Fundamentals of Materials Science and Engineering: An Integrated Approach, Fundamentals of Materials Science and Engineering: An Integrated Approach, William D. Callister Jr., David G. Rethwisch , Willey India. , 2021
- 2 Material Science, and Metallurgy, Material Science, and Metallurgy, O.P.Khanna, Dhanpatrai Publication, 2020
- 3 Physical metallurgy: principles and practice, Physical metallurgy: principles and practice, RAGHAVAN, V, PHI learning., 2015
- 4 Material Science and Metallurgy, Material Science and Metallurgy, U.C. Jindal, Pearson Education, 2011
- 5 Metallurgy for physicists and engineers : fundamentals, applications, and calculations, Metallurgy for physicists and engineers : fundamentals, applications, and calculations, Zainul Huda, CRC Press--Taylor & Francis Group , 2020

Suggested Theory Distribution:

The suggested theory distribution as per Bloom’s taxonomy is as follows. This distribution serves as guidelines for teachers and students to achieve effective teaching-learning process

Distribution of Theory for course delivery					
Remember / Knowledge	Understand	Apply	Analyze	Evaluate	Higher order Thinking / Creative
20.00	30.00	25.00	15.00	10.00	0.00

Instructional Method:

- 1 The use of ppt and videos is taken to teach the students

Supplementary Resources:

- 1 www.nptel.ac.in
