

COURSE TITLE	CREATIVITY, PROBLEM SOLVING AND INNOVATION
COURSE CODE	01EE0408
COURSE CREDITS	1

Objective:

- 1 To develop creative thinking skill in the students using cone of learning components leading to understanding of various strategies for creativity, problem solving and innovation.

Course Outcomes: After completion of this course, student will be able to:

- 1 Explain the importance of creativity, problem-solving, and innovation in addressing science, engineering, and social issues, using specific examples.
- 2 Analyze and explain how professional engineering practices are applied to solve a real-world problem.
- 3 Collaborate effectively as a member of a diverse team to achieve a common project goal.
- 4 Research and summarize technological advancements in a chosen field, explaining its potential impact on society.

Pre-requisite of course: Zeal to learn the subject

Teaching and Examination Scheme

Theory Hours	Tutorial Hours	Practical Hours	ESE	IA	CSE	Viva	Term Work
0	0	2	0	30	0	20	0
Contents : Unit	Topics						Contact Hours
Total Hours							

Suggested List of Experiments:

Contents : Unit	Topics	Contact Hours
1	Phase 1: To introduce the subject of the course; this course as a needed skill for your future. Psychology of problem solving; Vertical versus Lateral thinking	2
2	Phase 2 Strategy of Questioning; Method of questioning; Importance of asking the right question. Who, what, when, where, why, how?	2
3	Phase 3 Learning and its importance; Sources of learning; Methods of learning. Purpose and value of education in future creativity in real life.	2

Suggested List of Experiments:

Contents : Unit	Topics	Contact Hours
4	Phase 4 Strategy of Knowing how to see; Making your thought visible; Visualizing thinking; Mapping of mind, Fishbone diagram.	2
5	Phase 5 Strategy of Thinking Fluency; Generating all possibilities; more the better; Quantity without screening is helpful; SCAMPER technique; Creative or divergent idea generating thinking versus Critical or convergent idea selection thinking	2
6	Phase 6 Strategy of Fusing of ideas; Making novel combinations; Connecting the unconnected	2
7	Phase 7 Strategy of Looking at the other side, looking in other world, finding what you are not looking for and following it up	2
8	Phase 8 Strategy of Play, Importance of play; Diversion; Unstructured activities for sheer joy, Activities for joy, Let subconscious figure it out, Various puzzles as play or fun	2
9	Phase 9 Strategy of Awakenning the collaborative spirit, Collaborative thinking, brain storming, Innovation requires collaboration to make it happen.	2
10	Phase 10 Review Strategies for Creative problem solving methods, Five building blocks as per Fogler & LeBlanc, Stanford D school approach.	2
11	Phase 11 Strategy for critical thinking for Choosing, Creative or divergent thinking needs follow up by Critical thinking or Convergent thinking in order to choose the solution for implementation, Kepner-Tregoe (K.T.) method with an example, Edward De Bono CoRT thinking process including PMI (Plus, Minus and Interesting), Also Edward de Bono method of decision making called Six thinking hats	2
12	Phase 12 Edward de Bono explaining and teaching his ideas having evolved many years ago consisting as CoRT thinking tool, Lateral thinking and the decision making by Six thinking hats method.	2
13	Phase 13 Strategy for Making; From idea to innovation.	2
14	Phase 14 Individual presentation for 75 minutes by 15 students (5 minutes per student)	4
Total Hours		30

Textbook :

- 1 The surprising path to greater creativity, R. Keith Sawyer, Zig Zag, 2013

- 11 Creative Confidence: Unleashing the Creative Potential Within Us All by Tom Kelly and David Kelly. 2013
- 12 A Whack on the side of the head by Roger von Oech. Revised edition 1998
- 13 A Kick in the seat of the pants by Roger von Oech.1986
- 14 They all laughed by Ira Flatow. 1992
- 15 Imagine, How creativity works by Jonah Lehrer. 2012
- 16 101 Creative problem solving techniques by James m Higgins.1994
- 17 Creative approach to problem solving by Scott G Isaksen, K Brian Dorval, Donald J Treffinger. 2000
- 18 Creative problem solving An Introduction by Donald J. Treffinger, Scott G Isaksen and K. Brian Stead=Dorval. 4th edition, 2006
- 19 Strategies for creative problem solving by H. Scott Fogler & Steven E. LeBlanc. Second edition 2008
- 20 Game storming by Dave Gray, Sunni Brown and James Macanuf.2010
- 21 Creating minds by Howard Gardner. 1993
- 22 Creativity –Flow and Psychology of Discovery and Invention by Mihaly Csikzentmihalyi.1996
- 23 Aha! Insight by Martin Gardner. 1978
- 24 The Ultimate Lateral & Critical Thinking Puzzle book by Paul Sloane, Des MacHale & M. A. DiSpezio. 2002
- 25 Test your Lateral Thinking IQ by Paul Sloane. 1994
- 26 Intriguing Lateral Thinking Puzzles by Paul Sloane & Des MacHale.1996.

Suggested Theory Distribution:

The suggested theory distribution as per Bloom's taxonomy is as follows. This distribution serves as guidelines for teachers and students to achieve effective teaching-learning process

Distribution of Theory for course delivery
--

Remember / Knowledge	Understand	Apply	Analyze	Evaluate	Higher order Thinking / Creative
5.00	10.00	20.00	20.00	30.00	15.00
